

Greenhouse Gas Impact Reduction Goals

As part of our commitment to environmental sustainability and responsible business practices, Emmbi Industries Limited has undertaken a comprehensive greenhouse gas (GHG) inventory exercise in alignment with international standards. Based on the findings of the GHG Assessment Report conducted for the financial year 2023–24, we are pleased to outline our approach and strategic intent to reduce GHG emissions across our operations and value chain.

These goals are also in line with the commitments and disclosures made in our Annual Report 2023–24, where we emphasized the company's transformation strategy towards “Championing Sustainability Worldwide” and outlined our roadmap for increased recycled content, emission reduction, and clean manufacturing.

1. GHG Emissions Reduction Target

- **Base Year:** 2023–24
- **Target Year:** 2028-29
- **Strategy:** Reduce company-wide GHG emissions by 15% per kg material produced and dispatched by the target year.

2. Virgin Polymer Material Usage Reduction Target

- **Base Year:** 2023–24
- **Target Year:** 2028-29
- **Strategy:** In alignment with our Annual Report goals – this goal is regarding replacing usage of virgin polymer by using recycled polymer. Decrease virgin polymer usage by 15% per kg produced and dispatched by the target year.

3. Eco-Friendly Product Introduction Target

- **Base Year:** 2023–24
- **Target Year:** 2028-29
- **Strategy:** In alignment with our Annual Report goals – introduce and begin commercial supply of FIBC bags with 50% recycled content by the target year or before.

4. Public Disclosure of Targets

- **Base Year:** 2023–24
- **Target Year:** 2024-25
- **Strategy:** Begin public disclosure of GHG inventory, targets, and progress to being with Annual Report for FY 24-25 (for the year ending on 31st March 2025).
