Emmbi at GRAM Kota

GRAM Kota, Rajasthan was held between 24th – 26th May 2017 by FICCI (The Federation of Indian Chambers of Commerce and Industry). The exhibition was the single largest agriculture meet in the region that attracted the participation of around 54500 farmers, 18900 visitors, International Delegations from 6 countries, 10 International experts and over 200 corporates. FICCI had made arrangements for Jajam Choupals: Specially designed halls where farmers were given the opportunity to interact with Agri-Scientists and experts on crop-specific matters. They were also instructed on the best agrarian practices for increasing productivity and better utilization of technology.

Emmbi Industries Ltd. had a strategically located stall in exhibit 'A' which garnered plenty of attention from visitors due to the presence of the massive 13.5 feet wide Pond liner roll and a super attentive sales team. The three day event was a major success for Emmbi and several hundred leads were generated. The major observation from the event was the lack of awareness seen in several farmers with regards to the government schemes and norms for Pond Lining in their localities. The area in and around Kota has much potential for pond lining and must be well-tapped by the company in the coming years.

Triple Filter Test

One day an acquaintance met the great philosopher Socrates and said, "Do you know what I just heard about your friend?"

"Hold on a minute," Socrates replied.

"Before telling me anything I'd like you to pass a little test. It's called the Triple Filter Test."

"Triple filter?"

"That's right," Socrates continued. "Before you talk to me about my friend, it might be a good idea to take a moment and filter what you're going to say. That's why I call it the triple filter test. The first filter is Truth.

Have you made absolutely sure that what you are about to tell me is true?"

"No," the man said, "Actually I just heard about it and ..."

"All right," said Socrates. "So you don't really know if it's true or not.

Now let's try the second filter, the filter of Goodness.

Is what you are about to tell me about my friend something good?"

"No, on the contrary..."

"So," Socrates continued, "you want to tell me something bad about him, but you're not certain it's true.

You may still pass the test though, because there's one filter left: the filter of Usefulness.

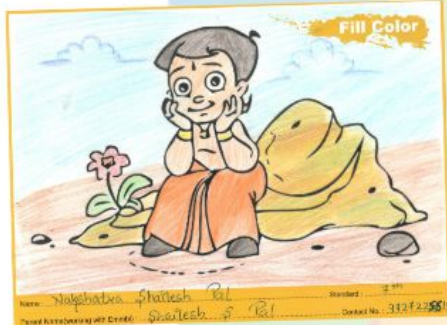

Is what you want to tell me about my friend going to be useful to me?"

"No, not really ..."

"Well," concluded Socrates, "if what you want to tell me is neither true nor good or even useful, why tell it to me at all?"

Your opinion on, Should all children be homeschooled?

✓ Yes

✗ No

? Can't Say

I am all for homeschooling, but forcing parents to homeschool their child is a terrible idea. Every child is different, so something that will work for one kid, isn't going to work for another. Also, some parents don't have to time or the ability to homeschool their kids, and thus public school is the best option for them personally. It would be the same as saying every child should go to public schools. Both of those extremes are complete rubbish.
