Management Commentary: Redefining Business through Groundbreaking thought processes

Sustainability is not just a fancy word, it is a way of life. Long and full of challenges. People, Corporations & Governments all over the world, will have to understand, plan and implement thought of sustainability in every walk of the life.

At Emmbi, we are focused to reduce the consumption of Virgin Polymer in our products without compromising the quality of the Product, increasing Cost of Consumption and compromising User Comfort.

WHY RECLAIM :
SOCIAL, ENVIRONMENTAL & LEGAL NEED

WHAT WE PROPOSE :
MIX POST CONSUMER WASTE (PCR)
AND POST-INDUSTRIAL WASTE (PIR)

Making a Positive Impact

Emmbi has identified that a long-term growth driver in polymer processing will be green polymers – substances that have the same functionality as current polymers, but a lower environmental impact. With this in mind, we have designed:

- *Emmbi Reclaim*
- *30% of the material used in the bag is industrially recycled*
- *Improves recycling efficiency*
- *Increasing demand in western markets*

Mastering the Complete Value Chain of Post Consumer Recyclate (PCR)

Strategic Way Forward	31
Investment Case	32

Strengths at Play - I

Technical Prowess

Emmbi Industries has established a reputation for its technical expertise, with a focus on adopting cutting-edge technology. The company has invested heavily in automation and digitalization to streamline operations and increase efficiency. An enterprise resource planning system has been implemented to ensure effective inventory management, production planning, and order fulfilment.

Fungible Manufacturing Capabilities

Emmbi Industries' ability to manufacture products for both B2B and B2C verticals using the same facilities has given the company a unique competitive edge. The fungibility in manufacturing allows the company to leverage existing infrastructure and resources to cater to a diverse set of customers, leading to diversified revenue streams and maintained operational efficiencies.

Strengths at Play - II

Robust Brand Building

The Company has made impressive strides in brand building, especially in its B2C vertical, resulting in elevated recall value. The Company's efforts in generating local employment opportunities have contributed to the socio-economic development of the communities in which it operates, building an authentic brand image that resonates with customers.

Future Polymer Solutions for Circular Economy

Disruption by decoding Fast Changing Polymer technology and Sustainability. In depth Knowledge & infrastructure for creating recycled polymer material for reducing the carbon footprint if the customers marching towards the direction of complete circular consumption cycle with specialized “Credle to Credle” approach.

Stepping ahead with Confidence

B2C

- Add 5-6 new products under brand Avana to achieve a target of ₹ 350 crores sales till FY29
- Plans to add pan India warehouses in the coming years and move to a model of Manufacturing -> Warehousing -> Retailing and moving away from the distributor model
- Add to the existing base of 800 retail touch points in Maharashtra and enter newer geographies FY25 onwards
- Increase ground team to ensure that the product and their applicability is well understood by the farmers

B2B

- Create and distribute sustainable polymer based products worldwide
- Create state of the art Post Consumer Recyclate (PCR) material re-processing facility
- Maintain the past growth rates by adding incremental capacities once capacity utilization crosses 90%
- Drive higher share from specialised products having higher margin and gradually phase out commoditized products
- Continue to invest in technology to automate the plant and drive efficiencies across the manufacturing operations

Unlocking Potential for a Brighter Future

- Reach ₹ 1,000 crores sales by FY29 and creating a 60-40% mix between B2B and B2C business verticals
- Gradually scale up margin profile to 15% by adding value added products, and increasing share of B2C business
- Further strengthening the balance sheet by moving towards an asset light model and freeing up working capital requirements by scaling up the B2C business that operates on cash and carry model

Unlocking Potential for a Brighter Future

- Sustainable Polymer Substrates will be future of Polymer Manufacturing & Distribution.
- **Reclaim 30** :- A Strong Tool for companies to march towards the goal of “Net Zero” emission policy
- **Hyperbolic FIBC** :- Sustainable & Cost-efficient solution to conventional Baffle Bags. Around 23% Reduction in Polymer consumption and around 20% reduction in Labor Cost

Pros:

- No Internal Baffles, more volume.
- Low polymer used, low cost and eco-friendly.
- Less number of seams, better sift-proofing.
