

LUMBER PACKAGING

Complete Lumber Protection Solutions

Our Lumber Protection range includes PP/HDPE Woven Covers and Wraps, as well as PE Film-based variants, all engineered for superior performance, durability, and impactful branding during storage and transit. These solutions are built to perform across a range of environments, offering key benefits such as:

- Special polymer blend prevents cracking in cold temperatures down to -40°F .
- Resistant to mold, mildew, and fungal growth for long-term protection.
- Supports multi-color printing up to 4 meters wide for strong branding.
- Matte or gloss finish available.
- 100% recyclable, supporting circular use and reduced environmental impact.
- UV-stabilized for long-term resistance to sunlight degradation.
- Offered in Reclaim30 and Reclaim50 variants (30% and 50% recycled rPP).

PP/HDPE Woven Lumber Covers/Hoods:

- Coated on both sides for superior weatherproofing and moisture resistance
- Transparent window option for easy product identification
- Customizable lengths and widths to cover different lumber stacks
- Reinforced edges for secure stapling and added strength
- Ideal for stacked lumber stored in open yards or warehouses

PP/HDPE Woven Lumber Wraps

- Designed for tight wrapping and bundling of lumber or plywood
- High tensile and tear resistance for rough handling and transit
- Reinforced edges to support automated stapling
- Excellent abrasion resistance for rugged logistics conditions
- Customizable width (up to 157 inches) and any length
- Ideal for kiln-dried wood, sawn timber & bundled plywood
- Supplied in C-folded rolls for fast application on wrapping lines

PE Film Lumber Wraps & Covers/Hoods

- Smooth surface allows sharp, high-quality multi-color printing
- Acts as a barrier against dust, moisture, and contaminants
- Wraps easily around irregular or smaller lumber bundles
- More flexible and Lightweight construction
- Suitable for short transits
