Reclaim30 – Labordata Certificates List

SR.NO.	SIZE (INT-CM)	S.W.L.	S.F.	GSM	BAG TYPE	LOOP TYPE	CERTIFICATE NO
1.	80x80x80	1000 KG	05:01	140	U+2	Corner	12348.2/22-3
	80x80x200						
2.	86x86x90	1250 KG	05:01	150	U+2	Corner	12353.1/22-3
	86x86x200						
3.	86x86x90	1500 KG	05:01	170	U+2	Corner	12353.2/22-3
	86x86x200						

Reclaim30 – The Future of FIBCs

As one of the global leaders in polymer processing, with state-of-the-art infrastructure, Emmbi has indigenously developed Reclaim30 – a compatibilizer-based technology that ensures 30%+ recycled PP in its FIBC bags. Emmbi’s Reclaim30 is the world’s first and only Labordata-certified recycled FIBC bag with Safety Working Loads of 1000 kgs, 1250 kgs, and 1500 kgs in a 5:1 Safety Factor. For additional shiploads, Emmbi has already partnered with leading processors. Furthermore, Emmbi’s Reclaim30 FIBC bags made with an advanced in-house reprocessing facility come with an assurance of end-to-end traceability and all the requisite regulatory documents for you to claim PPT exemptions as per your country’s applicable tax law.

Am I paying more or less for Reclaim

How do you expect an FIBC with 30% recycled PP content to compare to the equivalent FIBC made from virgin materials?

- Though there will be savings, it will be available from lower effective RM cost, the final cost will tend to be similar This is because:
- 10% extra gsm & 20% extra UV (trials under process)
- Additional cost of compatibilizer & added inventory carrying cost
- For any detailed quotes, reach out to your Emmbi Sales Representative

Why Reclaim30:

Social, Environmental &
Legal Need

How We Propose:

Mix Post Consumer Waste
And Post- Industrial Waste

What We do:
